

State of Alaska FY2008 Governor's Operating Budget

Department of Natural Resources Public Services Office Component Budget Summary

Component: Public Services Office

Contribution to Department's Mission

Facilitate one-stop public interface for divisions and offices of DNR.

Core Services

Provide one-stop services to the public in Anchorage and Fairbanks

- Provide DNR's initial point of contact for the public
- Receipt payments to DNR
- Conduct land sales
- Provide, accept and process applications for authorizations from DNR
- Assist customers using DNR data bases, mapping and other programs for land research
- Keep the public informed of DNR programs, policies, regulations, and activities
- Keep media, legislature and other offices informed of DNR activities and accomplishments
- Keep web pages and web content current and informative

Keep two staffed Public Information Centers available for Alaskans in Anchorage and Fairbanks:

The two Public Information Centers meet the first seven core services listed above. The centers provide a place for the public to go to ask questions, pay bills, get forms, obtain services, and complete research. The Centers are the difference between a complex agency understandable only to experts versus a public-friendly agency where forms, permits, and answers to questions are easily available to everyone.

The services provided under this component allow the department to efficiently conduct business with the public. These Centers provide basic essential business functions and services that insure timely processing of applications and payments. They also provide the time consuming public interface to allow other DNR employees to more efficiently conduct their assigned duties without interruption. The Centers make sure the public is able to find and obtain what they need from DNR while at the same time making the public aware of the need, purpose, and value of the State's land and resource assets and their appropriate management.

Keep the public, media, legislature, and other offices informed of DNR programs, policies, regulations, activities, and accomplishments:

Through media releases, public service announcements, and interviews the Public Services Office (PSO) insures effective media coverage on current DNR actions and issues. Through coordination with other agencies and information centers the PSO helps the public to understand DNR's interagency relationships and to insure accurate and current DNR information is disseminated. The PSO also provides feedback to DNR employees about public concerns, requests, desires, or misunderstandings. The PSO assists the Commissioner's Office to keep the Governor's Office informed of DNR accomplishments and activities.

Keep web pages and web content current and informative:

Front door pages of the DNR web site are maintained by the PSO. The PSO also has the oversight to insure that the content in the DNR web pages is current, informative, and user friendly.

Major Activities to Advance Strategies

- | | |
|--|--|
| <ul style="list-style-type: none"> • Keep two staffed Public Information Centers available for Alaskans in Anchorage and Fairbanks • Provide public access computers in the centers to allow land research. • Work with customers to insure complete applications and forms before forwarding to adjudicators. • Collect revenues and provide accurate receipting of financial transactions. | <ul style="list-style-type: none"> • Place current and updated information, fact sheets, forms and applications for all DNR programs on the web. • Create customer satisfaction card and track results. • Keep public informed of accomplishments, services and changes through the media. • Develop communication strategies for programs. • Respond to media and legislative requests for |

FY2008 Resources Allocated to Achieve Results

FY2008 Component Budget: \$509,800

Personnel:

Full time	6
Part time	0
Total	6

Key Component Challenges

As much of the public is becoming more computer literate and DNR makes many advances in the technology realm, the PSO will shift the services offered to maximize this trend. However, as we shift to many electronic services the human component of customer service will not be overlooked, as this is what most people want.

DNR is attempting to shift many of its business practices to be available by internet. The Public Information Centers are still crucial to assisting businesses, agencies, and individuals to conduct business either in person, by the phone, or on the web. The PSOs will modify business practices and services offered to match the changes in the program management in the various divisions.

As Department develops the Unified Permit System and transitions away from the Land Administration System Case Management System, there will be increased dependency on the PSOs to assist customers with the new system. Business practices will be changed both in the other divisions and in how applications are entered into the new system. Staff will need to learn how to effectively use new tools while conducting land research. The PSOs will be responsible for more scanning, data entry and functioning as the electronic application point of contact once the system is activated.

Significant Changes in Results to be Delivered in FY2008

The largest change will be the internal service changes related to technological advances.

Major Component Accomplishments in 2006

- The PSO assisted approximately 23,000 customers in person during FY06.
- The PSO receipted over \$9.6 million in revenues in FY06.
- The PSO produced or assisted in distribution of over 204 media releases.
- The PSO assisted in the marketing, implementation, and in-person sales for three new land sales and other continuing sales, each with different rules of participation.
- The PSO assisted in developing and maintaining the over 50 DNR web pages and fact sheets that more efficiently relay information to the public.
- The PSO assisted in the development and improvement of a new online public use cabin reservation system. This has been a huge success.
- Web contacts are up again. The PSO web page alone received 71,000 unique visitors in FY06 and the DNR site as a whole received over 740,000 unique visitors during the same time.

The Public Information Centers have produced multitudes of satisfied DNR customers, even when the customers were paying bills. That is because the Center's staff emphasizes customer service. Regardless of the issue or the nature of the contact, the staff endeavors to see customers leaving satisfied knowing they were treated well, professionally, and with respect. This helps improve the overall image of state government, that we are here to serve the people of this state.

The Centers help promote the use and development of state lands and resources. Many people came to the Centers not knowing exactly what they wanted or not understanding how to get something from DNR. The PSO worked with the customers to provide the information needed and helped people through the permitting and regulatory process as needed. The staff have spent the hours necessary to assist people researching land status or teaching customers how to conduct their own research. If customers had to speak with others beyond the PSO, the staff refined the questions to focus the time spent with other DNR staff. This has prevented numerous hours of interrupted DNR staff time. This in turn helped produce efficiency in DNR by improving cycle times.

Statutory and Regulatory Authority

The PSO provides the public contact and outreach required by the statutory authority of other components. It has no specific statutory authority.
